SUBJECT INDEX, VOLUME 11

Almost-parallel viscoelastic flows, 39
Annular flows for measuring the second normal stress difference, 347

Combined stress, modified superposition principle applied to creep of nonlinear viscoelastic material under abrupt changes in state of, 361
Complex moduli obtained from forced and free damped oscillations, 113
Concentrated solutions of narrow-distribution polystyrene, shear-rate dependence of viscosity in, 267
Creep of nonlinear viscoelastic material under abrupt changes in state of combined stress, modified superposition applied to, 361
Crystals, liquid, hydrostatic theory of, 5

Damped oscillations, forced and free, complex moduli obtained from, 113
Deformation behavior, large multi-axial, of a filled rubber, 245
Discontinuities, one-dimensional stress, propagation of, in homogeneous and inhomogeneous viscoelastic media, 287
Dynamic intrinsic viscosity of macromolecules with internal viscosity, 15
Dynamic oscillatory and steady flow experiments on polymer melts, 77
Dynamic response of periodically deformed non-Newtonian fluid films, 147

Elastic–viscoplastic stress–strain relations, 55
Excluded volume, molecular weight, and hydrodynamic interaction, effect of, on dynamic intrinsic viscosity, 15

Filled rubber, large multi-axial deformation behavior of, 245
Films, non-Newtonian fluid, periodically deformed, dynamic response of, 147
Flow, almost-parallel viscoelastic, 39
annular, for measuring the second normal stress difference, 347
helical, velocity profiles of a non-Newtonian fluid in, 125
steady, and dynamic oscillatory experiments on polymer melts, 77
in tubes, transient viscoelastic, 335
Flow activation energy and melt rheology of poly(vinyl chloride) 225
Flow properties of a partially crystalline polyethylene, 259
Fluid films, non-Newtonian, periodically deformed, dynamic response of, 147
Fluids, viscoelastic, modified functional expansion for, 381
Forced and free damped oscillations, complex moduli obtained from, 113
Functional expansion, modified, for viscoelastic fluids, 381

Growth and relaxation of shear and normal stresses, 181

Helical flow, velocity profiles of a non-Newtonian fluid in, 125
Homogeneous and inhomogeneous viscoelastic media, one-dimensional stress discontinuities in, 287

Hydrodynamic interaction, molecular weight, and excluded volume, effect of, on dynamic intrinsic viscosity, 15
Hydrostatic theory of liquid crystals, 5

Impact, responses of model viscoelastic materials to, 205
Inhomogeneous and homogeneous viscoelastic media, one-dimensional stress discontinuities in, 287
Internal viscosity, dynamic intrinsic viscosity of macromolecules with, 15
Intrinsic viscosity, dynamic, of macromolecules with internal viscosity, 15

Liquid crystals, hydrostatic theory of, 5

Melt rheology and flow activation energy of poly(vinyl chloride), 225
Melts, polymer, steady flow and dynamic oscillatory experiments on, 77
Memory, nonlinear material with, 307
Model viscoelastic materials, responses of, to impact, 205
Modified functional expansion for viscoelastic fluids, 381
Modified superposition principle applied to creep of nonlinear viscoelastic material under abrupt changes in state of combined stress, 361
Moduli, complex, obtained from forced and free damped oscillations, 113
Molecular weight, excluded volume, and hydrodynamic interaction, effect of, on dynamic intrinsic viscosity, 15
Multi-axial deformation behavior, large, of a filled rubber, 245

Narrow-distribution polystyrene, shear rate dependence of viscosity in concentrated solutions of, 267
Nonlinear material with memory, 307
Nonlinear viscoelastic material, creep of, under abrupt changes in state of combined stress, modified superposition principle applied to, 361
Non-Newtonian fluid films, periodically deformed, dynamic response of, 147
Non-Newtonian fluid in helical flow, velocity profiles of, 125
Non-Newtonian viscosity, normal stresses, and complex viscosity, 159
Normal and shear stresses, relaxation and growth of, 181
Normal stresses, non-Newtonian viscosity, and complex viscosity, 159

One-dimensional stress discontinuities, propagation of, in homogeneous and inhomogeneous viscoelastic media, 287
Oscillations, damped, forced and free, complex moduli obtained from, 113

Partially crystalline polyethylene, flow properties of, 259
Periodically deformed non-Newtonian fluid films, dynamic response of, 147
Polyethylene, partially crystalline, flow properties of, 259
Polymer melts, steady flow and dynamic oscillatory experiments on, 77
Polystyrene, narrow-distribution, shear rate dependence of viscosity in concentrated solutions of, 267
Poly(vinyl chloride) melt rheology and flow activation energy, 225
Propagation of one-dimensional stress discontinuities in homogeneous and inhomogeneous viscoelastic media, 287

Relaxation and growth of shear and normal stresses, 181
Rubber, filled, large multi-axial deformation behavior of, 245

Second normal stress difference, annular flows for measuring, 347
Shear and normal stresses, relaxation and growth of, 181
Shear-rate dependence of viscosity in concentrated solutions of narrow-distribution polystyrene, 267
Solutions, concentrated, of narrow-distribution polystyrene, shear-rate dependence of viscosity in, 267
  rheological properties of, 159, 181
Steady flow and dynamic oscillatory experiments on polymer melts, 77
Stress, combined, modified superposition principle applied to creep of nonlinear viscoelastic material under abrupt changes in state of, 361
  normal, non-Newtonian viscosity, and complex viscosity, 159
  shear and normal, relaxation and growth of, 181
Stress difference, second normal, annular flows for measuring, 347
Stress discontinuities, one-dimensional, propagation of, in homogeneous and inhomogeneous viscoelastic media, 287
Stress–strain relations, elastic–viscoplastic, 55
Superposition principle, modified, applied to creep of nonlinear viscoelastic material under abrupt changes in state of combined stress, 361

Transient viscoelastic flow in tubes, 335
Tubes, transient viscoelastic flow in, 335

Velocity profiles of a non-Newtonian fluid in helical flow, 125
Viscoelastic flows, almost-parallel, 39
  in tubes, transient, 335
Viscoelastic fluids, modified functional expansion for, 381
Viscoelastic material, nonlinear, creep of, under abrupt changes in state of combined stress, modified superposition principle applied to, 361
Viscoelastic materials, model, responses of, to impact, 205
Viscoelastic media, homogeneous and inhomogeneous, one-dimensional stress discontinuities in, 287
Viscoplastic–elastic stress–strain relations, 55
Viscosity, dynamic intrinsic, of macromolecules with internal viscosity, 15
  non-Newtonian and complex, and normal stresses, 159
  shear-rate dependence of, in concentrated solutions of narrow-distribution polystyrene, 267

TRANSACTIONS of the SOCIETY OF RHEOLOGY

VOLUME 11, 1967

Editor: Raymond R. Myers

Kent State University
Kent, Ohio

Assistant Editors: Roger S. Porter

University of Massachusetts
Amherst, Massachusetts

Hershel Markovitz

Mellon Institute
Pittsburgh, Pennsylvania

E. B. Bagley

Washington University
St. Louis, Missouri

Steven Prager

Copyright © 1967 by John Wiley & Sons, Inc.

Statement of ownership, management, and circulation (Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. Date of filing: September 22, 1967

2. Title of Publication: Transactions of the Society of Rheology

3. Frequency of Issue: Three issues per year

4. Location of known office of publication: 20th and Northampton Streets, Easton, Pennsylvania 18042

5. Location of headquarters of general business offices of publisher: 605 Third Avenue, New York, New York 10016

6. The names and address of publisher, editor, and managing editor:
Publisher: Eric S. Proskauer, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Editor: Raymond R. Myers, Kent State University, Kent, Ohio
Managing Editor: None

7. Owner: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Stockholders owning or holding 1 per cent or more of total amount of John Wiley & Sons, Inc., stock as of August 29, 1967
Edward P. Hamilton, as Trustee under will of Elizabeth Hamilton, c/o Gifford, Woody, Carter and Hayes, 1 Wall Street, New York, N. Y. 10005; W. Bradford Wiley and Edward P. Hamilton, as Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, N. Y. 10016; W. Bradford Wiley and Francis Lobdell, Trustees of Elizabeth Wiley Hamilton Trust, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, N. Y. 10016; Cynthia W. Darby, Box 651, Bridgehampton, L. I., New York 11932; Cynthia W. Darby and Julia Wiley Gilbert, as Trustees under the will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter and Hayes, 1 Wall Street, New York, N. Y. 10005; Julia Wiley Gilbert, Box 1191, Carmel California; Edward P. Hamilton, Katonah, New York; Edward P. Hamilton and Cynthia W. Darby, as Trustees under will of William O. Wiley, c/o Gifford, Woody, Carter and Hayes, 1 Wall Street, New York, N. Y. 10005; S. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Willy Levinger, 336 Central Park West, New York, N. Y.; Mrs. R. R. Pennywitt, 49 Bristol Place, Bay Head, New Jersey; Maurits Dekker, 511 West 232nd Street, Bronx, New York; Rozetta S. Dekker, 511 West 232nd Street, Bronx, New York; Eric S. Proskauer and Charles H. Lieb as Trustees u/a dated 11/27/62 made by Jenny R. Proskauer, 220 Central Park South, New York, N. Y.; C. R. Runyon, Jr., 130 East End Avenue, New York, N. Y.; Francis Lobdell and William J. Seawright, as Trustees for William Bradford Wiley, 2nd, Peter Booth Wiley, Deborah Elizabeth Wiley; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; Reing and Company, P. O. Box 491, Church Street Station, New York, N. Y. 10015; Shaw and Company, P. O. Box 491, Church Street Station, New York, N. Y. 10015.

8. Known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities; None.

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees hold stock and securities in a capacity other than that of a bone fida owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 per cent or more of the total amount of the stock or securities of the publishing corporation.

10. This item must be complete for all publications except those which do not carry advertising other than the publishers own and which are named in Sections 132.231, 132.232, and 132.233, Postal Manual (Sections 4355a, 4355b, and 4356 of Title 39, United States Code).
I certify that the statements made by me above are correct and complete:

Eric S. Proskauer
